```

This diagram illustrates the functional modules of a Student Record Management System. The main module, '学籍信息管理' (Student Record Management), is positioned at the top and branches into four distinct functions: '统一登录验证登录' (Unified login verification and login), '学生/教务登出' (Student/Staff Logout), '学生查看/更新/填写学籍信息' (Student View/Update/Enter Student Record Information), and '教务审核/修改学生学籍信息' (Academic Affairs Review/Modify Student Record Information). Each function is represented by a rectangular box, and the relationships are indicated by arrows pointing from the main module to the sub-modules.
